PROFILE

Third-year Computer Science student at Western University building hands-on experience in security monitoring and systems administration through a self-directed SOC homelab, including SIEM logging and alerting, network segmentation, and automated, containerized attack simulation. Comfortable working across Linux systems, the command line, and scripting/automation tooling, with a growing, self-directed interest in cybersecurity and IT/network operations. Brings strong communication and adaptability from tutoring and event coordination experience.

SKILLS

- **Technical:** Java, C, Python, Linux/Unix, Bash, Git, GitHub, Docker, libvirt, iptables, Wazuh (SIEM)
- **Security & Systems:** SIEM Logging & Alerting, Network Segmentation, Firewall Configuration, Intrusion/Attack Simulation, Virtualization, Shell Scripting & Automation, Symmetric Encryption
- **Interpersonal:** Problem Solving, Clear Communication, Technical Assistance, Collaboration, Adaptability, Curiosity, Critical Thinking

PROJECTS

SOC Homelab Project

Summer 2025 - Present

- Established real-time security event logging and alerting across a multi-VM environment by deploying Wazuh SIEM, enabling detection and analysis of simulated attack activity.
- Contained and isolated offensive/defensive simulation activity by architecting a segmented network with iptables, separating an attacker VM from target systems for safe, hands-on attack analysis.
- Reduced manual environment setup time by automating VM and container provisioning with shell scripts, enabling on-demand deployment of Windows and Ubuntu target systems through Docker and libvirt.

Local Text File Encryption Tool | [Java](#)

Summer 2024

- Designed and implemented a local file encryption and decryption tool using symmetric encryption, eliminating cloud dependency and strengthening data security.
- Developed a command-line interface that enables users to encrypt, decrypt, and manage files efficiently.
- Ensured secure file handling, usability, and robust error management for practical applications.

EDUCATION

BSc. - Specialization in Computer Science

Western University

London, ON • Expected Jun. 2028

VOLUNTEER EXPERIENCE

Tutoring | [Blakeburn Elementary School](#)

Jan. 2024 to Jun. 2024

Port Coquitlam, BC

- Tutored Grade 3 students through hands-on mini projects and outdoor educational activities while adapting to diverse learning styles.
- Collaborated with leadership program students to plan and host weekly learning events and acted as a positive role model, encouraging teamwork and confidence.

Tour de Fox Guide | [Terry Fox Secondary School](#)

Jan. 2024

Port Coquitlam, BC

- Led guided tours for groups of Grade 8 students, introducing school facilities, programs, and course pathways.
- Communicated with students and parents to address questions and ensure a smooth high school transition.
- Facilitated interactive activities to boost engagement and participation.

Pro-D Day Assistant | [Terry Fox Secondary School](#)

Feb. 2024

Port Coquitlam, BC

- Supported school-wide professional development events by coordinating logistics and assisting visiting educators.
- Provided on-site technical support during events, including projector setup, cable management, wireless connectivity troubleshooting, and facility navigation, maintaining event flow.
- Guided attendees through digital check-in and event schedules, improving registration efficiency.
